

# Jamalam / James

I have been modding for 4 years and currently have over 30,000,000 downloads on Curseforge. I have worked with several high-profile YouTube clients, as well as private clients and server owners. Below is a selection of examples of my past work - although you can find a more comprehensive list of my personal projects on my GitHub or Curseforge.

## COMMISSIONED PROJECTS

### 'Minecraft But You Can Grow Mobs' — Jagster

A mod that allows the player to grow mobs out of seeds. [YouTube](#)

### 'Minecraft But There Are Storms' — SocksFor1

A mod that adds a random storm every 60 seconds, such as acid rain or random loot.

### Alt Checker — Private Client (Server Owner)

A Fabric server-side mod that records IP addresses to prevent a single player joining with multiple accounts.

## PERSONAL PROJECTS (MINECRAFT)

### RightClickHarvest — 16M+ Downloads

### JamLib — 10M+ Downloads

### Utility Belt — 500K+ Downloads

## PERSONAL PROJECTS (NOT MINECRAFT)

### Pigeon Mail

'Chat with a daily pen pal, completely anonymously.' My entry to the Supabase Hackathon.

### Doogle

A stress-relieving website which shows users images of dogs! They can swipe left or right to up or down vote the pictures.

### Pest IDE Support

I created, and maintain, the IDE tooling for the [Pest parser generator](#), including various editor extensions and the language server.

## SKILLS

Fabric, Forge, and Neoforge modding

Multiloader modding using Architecture

Working with clients to flesh out ideas

Working to tight deadlines

Web development with a variety of frameworks

## LANGUAGES

Java, Rust, TypeScript/JavaScript (along with HTML and CSS, including Tailwind), C#
